

JAKE JOYNER

La Jolla, CA

☎ (310) 488-9808 ✉ jjoyner@ucsd.edu 🌐 github.com/jakejjoyner

EDUCATION

Santa Monica College

Computer Science

February 2023 - June 2025

3.9 GPA, Scholars Program, Dean's List

University of California, San Diego

Mathematics/Computer Science

September 2025 - June 2027

4.0 GPA

CAREER OBJECTIVE

I want to work on problems that are intellectually stimulating, within a supportive environment.

RELEVANT COURSEWORK

Upper division math courses (abstract algebra, combinatorics, extremal graph theory, etc.)

PROJECTS/RELEVANT EXPERIENCE

Transfer Research Experience, UC San Diego (T-Rex)

August 2025

- **Paired with a faculty mentor**, learned about optimization techniques used in modern machine learning. **Presented a research poster at the ending ceremony** and learned how researchers collaborate and share their work.

Restoration Technician, True West Motorworks

September 2025 - Present

- Repairing and **bringing back to life neglected cars**, specifically old VWs. Skills include diagnostics, engine repair, spot welding, and general mechanical work. I have worked on at least 10 cars and have **diagnosed around 100 issues**, conservatively (I work on the same cars / buses a lot).

Volunteer, American Cancer Society, Los Angeles

September 2020 - January 2022

- Fixed and **helped sell hundreds of refurbished watches**, priced/tagged items, steamed clothes, categorized donations, hung clothing items on racks.

EXTRACURRICULAR ACTIVITIES

Computer Engineer, NASA Community College Aerospace Scholar (NCAS) Mission 2: Exploration Simulation

- Collaborated with a 10-person team to design a successful Mars mission simulation, integrating robust computer systems; met daily to align on project goals and presented findings to a panel of NASA engineers, resulting in optimized mission performance and enhanced team decision-making.

TECHNICAL SKILLS

Languages: Python, C/C++, Go, HTML/CSS, Javascript, SQL, Java

Tools and Technologies: LaTeX, Neovim, Neovim Plugins, Linux Command Line, OpenGL, React, Git, Docker, SQLite, Pandas
